

# CONOCO HEADQUARTERS

LONDON

## CLIENT: CONOCO PHILIPS

Lees associates carried out a feasibility study for the relocation of Conoco Philips European HQ, culminating in the fit-out of 60,000sq foot high quality office space.

In order to settle on this location Lees Associates undertook a property evaluation of 5 sites including a Move or Stay option. We also advised Conoco on their property holdings in Aberdeen, looking at ways of adding 80/120 additional staff into their existing premises at Rubislaw.

Lees Associates provided a full design service including 3D fly-through visualisations, colour boards, materials specifications, furniture procurement and production information packages.

We also carried out a space audit and space planning services in order to optimise on use of space, flexibility and working practices.
