

SALOMON BROTHERS

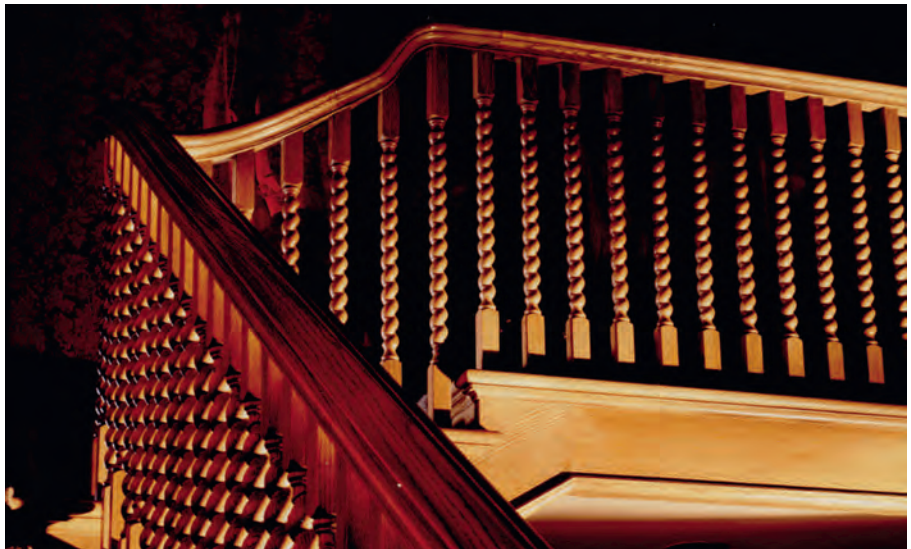

VICTORIA PLAZA

CLIENT: SALOMON BROTHERS INT.

Our initial involvement was the creation of prestigious executive hospitality facilities comprising Reception and Ante-room areas, a grand staircase, Boardroom and a suite of Dining and Meeting rooms.

Our success in delivering this quality environment was rewarded by repeat business for a continuous 'roll out' of projects over six years including the Design Modification Management for a 220 position Dealing Room, and Data Centre which demanded a particularly high level of co-ordination for M&E and Information Technology disciplines.

We set up the management systems to deliver the space planning and restack of the support offices comprising 400,000 sq ft over 4 floors including the integration of an 80 position Trading Room and support offices for Phibro Energy (Salomon's parent company) at 3rd floor level.
